#### Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: http://www.uspto.gov/main/howtofees.htm.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

- 1. All pending claims 1 and 3-48 are allowed. Claims 1, 9-11, 17, 21-24, 34-37, and 45-48 are independent.
- 2. The following is an examiner's statement of reasons for allowance:

Claims 11-48 were indicated allowed in the previous Office action dated March 31, 2003.

Claims 1, 9 and 10 each have been amended to include the limitation of claim 2, now canceled, which was indicated to contain allowable subject matter. The combination of the controlling to scan the original irradiated with the invisible light and then to scan the original with visible light, and when the original is irradiated with visible light, scanning the original in a rough scan and then in a fine scan under a required condition on the basis of information scanned in the rough scan, is not taught by the prior art of record.

Claims 3-8 depend upon claim 1.

Claims 11, 21, 23, are allowable over the prior art of record because the prior art does not teach the controlling to scan image information of an original by the light in the first wavelength range in a motion in one direction of the reciprocal motion, and to scan image information from the original by the light in the second wavelength range in a motion in the other direction of the reciprocal motion, in combination with other limitations of any of claims 11, 21, and 23.

Claims 12-16 and 18-20 depend upon claim 11.

Claims 17, 22, 24, are allowable over the prior art of record because the prior art does not teach an operation ode that skips a scan for image information by the light in the second

Application/Control Number: 09/396,244 Page 3

Art Unit: 2622

wavelength range upon scanning the image information of the original is selectable, in combination with other limitations of any of claims 17, 22, and 24.

Claims 25, 34, 35, allowable over the prior art of record because the prior art does not teach a method or a scanning apparatus which makes three types of scans including a rough scan using visible light at a low resolution, a fine scan by visible light at high resolution, and an invisible light scan by invisible light, the invisible light scan being at a lower resolution than that of the fine scan by visible light.

Claims 26-33 depend upon claim 25.

Claims 36, 37, 45-48 each recite limitations similar to those of claims 25, 34, or 35, i.e., the invisible light scan is completed within a shorter period of time than the visible light scan as claimed in claims 36, 45 and 47, or the invisible light scan by a relative motion at a higher speed than that for the visible light scan as claimed in claims 37, 46 and 48. This in combination with other limitations including scanning by a relative motion between the original and the line sensor, is not taught by the prior art of record.

Claims 38-44 depend upon claim 36.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
